Up and Down the Stack**

In-house Party Applications
3rd Party Applications – ERP, CRM
Database, Web Server, Mail, etc
Server
Network

From low-level network devices and SNMP-enabled systems, right up through servers, databases, and to applications, ScienceLogic allows you to monitor every part of your organisations technology assets.

Monitoring solutions for the network, Data Centre, cloud and beyond.

Key Features

Core Functionality made easy

ScienceLogic provides all the standard features of a monitoring tool but with auto-discovery and templating features, they are even easier to deploy.

Seamless Cloud Management

Built to manage a cloud environment, including AWS and Azure component. On premises and cloud resources managed in one place.

Understands Virtualisation

ScienceLogic has full support for managing a virtualised environment. It understands relationships and has detailed solutions for all hypervisors.

Sees through firewalls

ScienceLogic can manage a multi-zoned and even multi-tenanted environment. No problem with duplicate IP addresses.

PowerApps

Over 1,500 PowerApps available for free download to manage specific systems and applications.

Easy Integration

Works with all major systems. No need to replace your existing system if you just need more functionality. Licenced based upon nodes managed so easy to introduce slowly to your environment.

No lock in

Unlike many traditional monitoring systems ScienceLogic has no up front licence fee, no maintenance fee and no minimum commitment. Just pay a small amount each month for the nodes you are actually using it to monitor. Stop any time.

Plus Everything Else

Asset Management, Trouble Tickets, Cloud cost management, VM utilisation and more

Why 17 Ways

At 17 Ways we have decades of experience with network and systems management solutions. We have operated, upgraded, installed and rolled out many of the systems from the big vendors. One of us even wrote a book about systems management for IBM*.

In our opinion ScienceLogic is the best monitoring tool currently available for enterprise customers.

As well as being a reseller of ScienceLogic, 17 Ways can help you with advice on the best way to implement it.

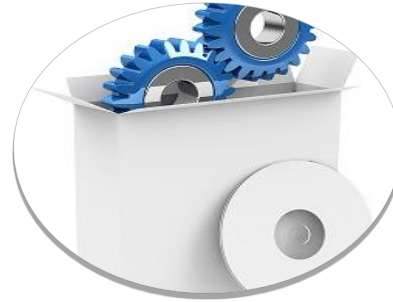

About 17 Ways

We are an Australian technology company providing hardware, software and advice to Australian businesses.

Hardware

17 Ways are a reseller of converged and commodity hardware solutions. We are working with a number of the leading international companies in this space. In addition to providing the best solutions for your business we can also provide integration and migration support and can advise on the organisational change required to get the most out of your infrastructure solutions. Alternatively, if you prefer, we can manage the entire system for you.

Software

17 Ways offer a full range of software development and maintenance services. With senior staff based in Sydney and access to a team of highly skilled programmers and testers, we can provide a high quality service to companies that need custom software development.

Advice

Technology is increasingly complex and business critical. Making the wrong technology decisions has far reaching consequences for any business. At 17 Ways we have the experience to help you across a range of technical areas including infrastructure, applications, integration, operations, organisational structure and strategy. We can provide advice or implement part or all of the solution for you.
